Summary

Frontend Developer with 3+ years of experience in developing responsive web applications using React.js, JavaScript (ES6), Node.js, Express.js, and MongoDB. Strong knowledge of React Hooks, Context API, Redux, REST API integration, and frontend development concepts. Experienced in building scalable UI components, API integration, debugging, and Agile methodologies. Passionate about delivering high-quality user-friendly applications and continuously learning modern web technologies.

Technical Skills:

- Frontend Technologies: HTML5, CSS3, JavaScript (ES6), React.js
- React Concepts: React Hooks, Context API, Redux, Redux Toolkit
- Backend Technologies: Node.js, Express.js
- Familiar with C# and ASP.NET core fundamentals
- Database: MongoDB, MySQL, Oracle SQL
- API Integration: REST API, JSON Services, Axios, Postman
- Tools: GitLab, JIRA, Confluence
- Other Skills: Responsive Web Design, Agile Methodology, Debugging
- Experience in reusable component development
- Strong experience with asynchronous programming and API handling
- Familiar with Git version control
- Ability to work in Agile/Scrum environment
- Experience in debugging and browser developer tools
- JavaScript ES6 Features: Arrow Functions, Promises, Async/Await, Destructuring, Spread Operator, Array Methods

Experience

Zlendo Technologies Pvt. Ltd.
Apr 2024 - June 2024 (3 months)
Project Name: CLife
Technology: React JS, Node JS, HTML 5, CSS3, JavaScript.
Team Size: 10

Project Description: Vendor contract management is a standardized process established for managing the entire lifecycle of vendor or supplier contracts. The standardized process covers everything from contract creation, negotiation, and execution to storage, tracking, and renewal. It also involves ongoing analysis of contract data to improve vendor performance and cost optimization.

Responsibilities:

- Developed responsive web pages using React.js, HTML5, CSS3, and Bootstrap
- Implemented React Hooks and Context API for state management
- Integrated REST APIs using Axios and handled API responses
- Worked with Redux for application state management

- Collaborated with backend developers and QA team in Agile environment
- Fixed UI bugs and improved application performance

Kevell Corp
Jul 2023 – Mar 2024(9 months)
Project Name: TickyTechies
Technology: Quasar framework (vue js)
Database: Mysql Workbench
Tool Used: GitLab Team Size: 8

Project Description:
Ticky techies is an online coding platform where kids are taught to code online by expert teachers.

Responsibilities:
- Analyzed project requirements and user stories
- Worked on frontend API integration
- Supported backend development activities
- Collaborated with team members in Agile environment

Project Name: Task Management Web & Mobile Application
Technology: React JS, Node JS, SSMS
Tool Used: GitLab Team Size: 3
Period: 07/2023 - 11/2023

Project Description:
Task management tools are an effective resource for teams, but can also be utilized by individuals. Task management tools help end users work smarter, get more done and experience more success.

Responsibilities:
- Developed frontend functionalities using React.js
- Integrated APIs and handled dynamic data rendering
- Worked on responsive UI design and bug fixing
- Collaborated with team members in Agile development process

Emids
Aug 2022 - May 2023 (10 months)
Project Name: IQVIA – IRP1 (Data Migration)
Technology: Java, Oracle SQL, PL/SQL
Tools used: Talend ETL.
Agile Methodologies: JIRA, Confluence
Team Size: 7

Project Description: Analyzing the method of transforming existing data into formats for the new environment. Loading data into other database structures. Reviewing existing migration tools and providing recommendations. Improving the performance of the migration process. Providing necessary changes and support documentation.

Responsibilities:

- Responsible for analyzing mapping documents.
- Responsible for performing migration and testing of static data and transaction data from one core system to another.
- Responsible for performing data migration audit, reconciliation and exception reporting.
- Responsible for managing cross-program data assurance for physical data items in source and target systems.
- Worked as a part of team as well as independently.

Zlendo Technologies Pvt. Ltd.
Feb 2021 - Aug 2022 (1 year 7 months)
Project Name: Fleecard Product
Technology: React JS, Node JS, HTML 5, CSS3, JavaScript. Team Size: 5

Project Description: A solution to view and manage the Digital card-based application. Provide powerful tools for end users to customize e cards for their own purpose which can be advertised and shared.

Responsibilities:
- Built reusable UI components using React.js and JavaScript ES6
- Developed responsive interfaces using HTML5, CSS3, and Bootstrap
- Worked on REST API integration and frontend validation.
- Used Redux for state management and data handling
- Participated in requirement analysis, debugging, and deployment activities

Education
Sethu Institute of Technology
Bachelor of Engineering, Electronics & communication Engineering 2016 - 2020
